

GEN Z Entrepreneurship Initiative

Community Action & Impact Project - Detailed Intern Guide

PARTICIPATION: All Over Pakistan / As Assigned

IMPORTANT: Dates, timings, venue/meeting details, team allocations, focal persons, and submission links will be shared separately in the relevant project group. This guide explains the project work and reporting expectations.

01 PROJECT OVERVIEW

The GEN Z Entrepreneurship Initiative introduces interns to entrepreneurship by taking them through a simple ideadevelopment journey: identify a real problem, understand the people affected by it, develop a practical solution, and present the idea as a basic business or social-enterprise concept. The project is designed to build problem-solving, creativity, basic market research, teamwork, business thinking, communication, and presentation skills. Interns may work individually or in teams depending on the structure communicated by the project coordinator. The focus is not on creating a fully operating company during the internship. The expected outcome is a well-thought-out, research-backed idea that clearly explains the problem, solution, target audience, basic business model, and how the idea could be implemented.

02 INTERNS TASK

- **STEP 1 - PROBLEM IDENTIFICATION:** Select a real problem, unmet need, or opportunity that can be addressed through a product, service, digital solution, or social-enterprise idea.
- **STEP 2 - BASIC RESEARCH:** Talk to or study the likely users/customers, understand the existing situation, and conduct basic market and competitor research using reliable sources.
- **STEP 3 - SOLUTION DEVELOPMENT:** Clearly explain your proposed solution, how it works, and why it is useful or different from existing alternatives.
- **STEP 4 - TARGET AUDIENCE:** Define who will use, benefit from, or pay for the solution. Describe the main customer/user group and the need you are solving for them.
- **STEP 5 - VALUE & BUSINESS MODEL:** Define the value proposition and explain, at a basic level, how the idea could operate, deliver value, earn revenue or sustain itself, and what key resources/partners may be required.
- **STEP 6 - EXECUTION & MARKETING:** Prepare a simple approach for launching, promoting, or testing the idea. Include the most relevant marketing channels or outreach methods.
- **STEP 7 - FINAL PITCH:** Organize the idea into a clear presentation and be ready to explain the problem, research, solution, target audience, business model, and implementation approach.

03 HOW TO REPORT THE TASK

- Submit one final entrepreneurship project/pitch in the format communicated by the project coordinator. A presentation is recommended because the final output is intended to be presented and explained.
- **The final submission should cover:** Project/Idea Name; Problem Identified; Proposed Solution; Target Audience/Customer; Basic Market & Competitor Research; Value Proposition; Basic Business/Sustainability Model; Marketing/Execution Approach; and Key Next Steps.
- Use simple evidence for your research where possible - for example brief survey/interview findings, competitor examples, observations, or credible secondary research. Do not submit only an idea statement without supporting reasoning.
- If working in a team, clearly mention the names of team members and ensure that each member contributes to the development and presentation of the project.
- Final presentation/submission date, team structure, and submission link will be communicated in the project group.
